

Summary of Dermatology NCCGs in UK

Although attempts are regularly made to keep the Database up-to-date figures may be inaccurate especially with increasing numbers of NCCGs leaving Secondary Care.

Note: Figures in red are from database January 2006

As of October 2006:

NCCGs

197 (176) are Non-GPs or GPs working predominantly in Dermatology

- 76 (63) are ASs – 6 are acting as locum Consultants
- 55 (52) are SGs
- 8 (10) are TGs
- 58 (51) are Non-GP CAs / HPs – or GPs working predominantly in Dermatology

I have not included figures on GP CAs and HPs or GPwSIs as I have not had a recent update from most of the BAD Regional Representatives. I suspect my figures are now inaccurate as many GP NCCGs appear to be leaving Secondary Care.

GP and non-GP NCCGs who have left

195 (146) NCCGs appear to have left Secondary Care Dermatology in the last 2½ years. Many do not appear to have become GPwSIs / PwSIs
