Cosentyx (secukinumab) Prescribing Information

**Indication:** Cosentyx is indicated for the treatment of moderate to severe plaque psoriasis in adults who are candidates for systemic therapy.

**Dosage & Method of Administration:** The recommended dose is 300 mg via subcutaneous injection. Dosing is given at weeks 0, 1, 2, and 4, followed by monthly maintenance dosing starting at Week 4. Each 300 mg dose is given as two subcutaneous injections of 150 mg. If possible, areas of the skin that show inflammation. Thus normalisation of CYP450 levels may be anticipated during secukinumab treatment, with accompanying lower exposure of CYP450 metabolised co-medications.

**Contraindications:** Severe hypersensitivity reactions to the active substance or to any of the excipients. Clinically important, active infection.

**Warnings & Precautions:** Infections: Cosentyx has the potential to increase the risk of infections. In clinical studies, most of these were mild or moderate upper respiratory tract infections such as nasopharyngitis and did not require treatment discontinuation. Non-serious mucocutaneous candida infections were more frequently reported for secukinumab than placebo in the psoriasis clinical studies. Caution in patients with a chronic infection or a history of recurrent infection. Advise patients to seek medical advice if signs or symptoms suggestive of an infection occur. If a patient develops a serious infection, the patient should be closely monitored and Cosentyx should not be administered until the infection resolves. Cosentyx should not be given to patients with active tuberculosis. Anti-tuberculosis therapy should be considered prior to initiation of Cosentyx in patients with latent tuberculosis. Crohn’s disease: Caution in patients with Crohn’s disease - exacerbations of Crohn’s disease, in some cases serious, were observed in clinical studies. Patients who are treated with Cosentyx and have Crohn’s disease should be followed closely. Hypersensitivity reactions: If anaphylactic or other serious allergic reactions occur, discontinue immediately and initiate appropriate therapy. Vaccinations: Live vaccines should not be given concurrently with Cosentyx. Patients receiving Cosentyx may receive concurrent inactivated or non-live vaccinations. Loeza-Sensitive Individuals: The removable needle cap of the Cosentyx pre-filled syringe and the pre-filled pen contains a derivative of natural rubber latex.

**Concomitant Immunosuppressive therapy:** Combination with immunosuppressants, including biologics, or phototherapy - have not been evaluated.

**Interactions:** Live vaccines should not be given concomitantly with Cosentyx. No interaction studies have been performed in humans. The formation of some CYP450 enzymes are suppressed by increased levels of cytokines during chronic inflammation. Thus normalisation of CYP450 levels may be anticipated during secukinumab treatment, with accompanying lower exposure of CYP450 metabolised co-medications.

Therefore, a clinically relevant effect on CYP450 substrates with a narrow therapeutic index, where the dose is individually adjusted (e.g. warfarin) cannot be excluded. On initiation of secukinumab therapy in patients being treated with these types of medicinal products, therapeutic monitoring should be considered.

**Fertility, pregnancy and lactation:** Women of childbearing potential: Women of childbearing potential should use an effective method of contraception during treatment and for at least 20 weeks after treatment. Pregnancy: It is preferable to avoid the use of Cosentyx in pregnancy, due to lack of adequate data. Breastfeeding: Clinical decision on continuation of breast feeding during secukinumab treatment (and up to 20 weeks after discontinuation) in nursing mothers must be made, taking into account the benefit of breast feeding to the child and the benefit of Cosentyx therapy to the woman. It is not known if secukinumab is excreted in human breast milk. Fertility: The effect of secukinumab on human fertility has not been evaluated.

**Adverse Events:** Very Common (≥1/10); Upper respiratory tract infection. Common (≥1/100 to <1/10): Oral herpes, rhinorrhea, diaphoresis, urticaria. Infections: In the placebo-controlled period of clinical studies in plaque psoriasis, infections were reported. The majority of infections consisted of non-serious and mild to moderate upper respiratory tract infections, such as nasopharyngitis, which did not necessitate treatment discontinuation. There was an increase in mucosal or cutaneous candidiasis, but the cases were mild or moderate in severity, non-serious, responsive to standard treatment and did not necessitate treatment discontinuation. Serious infections occurred in a small proportion of patients in both the Cosentyx and placebo groups. Over the entire treatment period (up to 52 weeks), infections were reported in 47.5% of patients treated with Cosentyx (0.9 per patient year of follow up). Serious infections were reported in 1.2% of patients treated with Cosentyx (0.015 per patient year of follow up). Neutropenia: Neutropenia was more frequently observed with secukinumab than with placebo, but most cases were mild, transient and reversible. There were no reported cases of neutropenia more severe than Grade 3.

**Immunogenicity:** Less than 1% of patients treated with Cosentyx developed antibodies to secukinumab up to 52 weeks of treatment. Other Adverse Effects: Please consult the Summary of Product Characteristics for a detailed listing of all adverse events before prescribing.

**Legal Category:** POM

**MA Number & List Price:** EU/1/14/980/004 & EU/1/14/980/005 - 150 mg pre-filled pen x2 £1,218.78.

**PI Last Revised:** January 2015

**Full prescribing information, including a SmPC is available from:** Novartis Pharmaceuticals UK Limited, Frimley Business Park, Frimley, Camberley, Surrey, GU16 7SR. Telephone: (01276) 692355 Fax: (01276) 692508.

**Adverse Event Reporting:** Adverse events should be reported. Reporting forms and information can be found at www.mhra.gov.uk/yellowcard. Adverse events should also be reported to Novartis Pharmaceuticals UK Ltd on 01276 69 8370 or via medinfo.uk@novartis.com.

HISTORICAL ABSTRACT SELECTION

The British Association of Dermatologists gratefully acknowledges the contribution of the many exhibitors & sponsors whose attendance has helped make the meeting possible.
Welcome to Manchester and the 95th Annual Meeting of the British Association of Dermatologists. We are once again delighted to be in the award winning Manchester Central Convention Complex.

Manchester will provide the ideal back-drop for this year’s Annual Meeting. At the heart of the city you’ll find Petersfield – the dedicated conference quarter which houses Manchester Central offering world class conference, exhibition and meeting facilities, surrounded by an array of hotels within a five minute walk. You are guaranteed to be welcomed, inspired and assured that Manchester is more than just a conference destination; Manchester is a modern city that is dynamic, and energetic. Mancunian friendliness is legendary and an enthusiastic welcome is guaranteed!

SCIENTIFIC PROGRAMME

Building on its reputation as a high quality internationally renowned event, the BAD Conference and Events committee has again worked hard to provide a blend of new scientific presentations with updates from experts in various fields. We are pleased that the Arthur Rook Oration will be delivered by Professor Masayuki Amagai from Tokyo, Japan. EADV President Professor Erwin Tschachler (Vienna) and Professor Robert Modlin (Los Angeles), will give the first of the guest lectures at the plenary session on Tuesday speaking on ‘The dermatologist and the HIV/AIDS pandemic’ and ‘Learning from Leprosy: An Excellent Adventure’ respectively. Wednesday mornings programme features Professor Günther Hofbauer from Zurich who will update participants on ‘Mechanisms in epithelial skin cancer development’. This year we have an additional guest lecture to be given by Professor Lars French from Zurich speaking on ‘The Inflammasome, Autoinflammation and Skin Disease’. This will begin the medical Dermatology Session on Wednesday afternoon. The final guest lecture will come from closer to home with Professor Chris Griffiths, talking during the CPD session on Thursday afternoon on ‘Psoriasis: A Natural History’.

We have a new International Dermatology CPD session on Wednesday morning and following feedback from the 2014 evaluation we have spread the Special Interest Groups to offer a better balance to the three days. Please also look out for the Hot topics and Poster Presentations within the Exhibition Hall. Those attendees not participating in the AGM on Wednesday are encouraged to register for the Public Lecture being given by Dr Christian Jessen.

Don’t forget to download the new BAD2015 app and see the new features as we look to improve our audience interaction (details on page 79).

Socially, the Annual Dinner will be at Manchester Cathedral on Wednesday evening, with a Welcome Reception in the Central Foyer of Manchester Central on the Tuesday evening.

It all promises to be a packed and memorable meeting, I personally look forward to offering a warm welcome to all delegates and hope you enjoy the meeting!

Irene Leigh
Academic Vice President (2013-2015)

ACCOMMODATION
If you have booked your accommodation through Innov8 and have any issues they will be available to speak to directly on Tuesday. Please come to the registration area. Alternatively they can be contacted on 0844 887 1550.

APP
We are pleased to announce that we will be providing a smartphone conference app for delegates to use during the conference. The app will provide the following features:
- Review agenda & speakers
- View sponsors & exhibitors
- Interactive floorplans
- View abstracts & e-posters
- Own CPD
BAD 2015 is grateful to Janssen for sponsoring this app.

BADGES
Conference badges will be handed to delegates on registration. For security purposes name badges must be worn at all times throughout the meeting. In the event that you lose your badge, a replacement must be obtained at the registration desk immediately.

BANKING
ATM facilities are available in the Central Foyer.

BUSINESS SERVICES
Manchester Central has a dedicated Business Centre at the concierge desk in the Central Foyer.

CATERING
Lunch and all scheduled refreshment breaks will be served from designated points in the exhibition area, Central Hall of Manchester Central.

CERTIFICATE OF ATTENDANCE
Certificates of attendance will be in your registration envelope.

CLOAKROOM
There is a cloakroom located in the Central Foyer.

CPD
This event is approved for external credit for the CPD scheme of the Federation of Royal Colleges of Physicians of the UK. Physicians should record their credits in their diaries, in accordance with the current RCP recommendations. Participants should only record the number of hours they attended. The main meeting has been approved for 18 credits and the CPD code is 97571.

EXHIBITION
The exhibition will be located in Central Hall of Manchester Central and will be open at the following times:
- Tuesday 7th July: 10:00 – 17:30
- Wednesday 8th July: 08:30 – 17:00
- Thursday 9th July: 08:30 – 14:00

EXHIBITION QUIZ
Exhibition quiz forms will be included in the delegate bags. To participate in the quiz, delegates must visit each participating exhibitor and answer a simple question. Participants must also obtain four answers from the patient support groups. All completed quiz forms must be returned to the registration desk by 14:00 on Thursday 9th July. The prizes will be announced after the meeting.

FIRST AID
Please visit the concierge desk and they will be able to direct you.

PARKING
There is an NCP (National Car Park) directly below Manchester Central that is open 24 hours a day. It has 720 spaces including 18 disabled parking bays and there is direct access to Manchester Central by lift, stairs and escalators.

PAYMENT OF REGISTRATION FEES
We would prefer delegates to pay by cheque (pounds sterling drawn on a UK bank only or by sterling bank draft) made payable to the ‘British Association of Dermatologists’. Cheques in other currencies cannot be accepted. Alternatively, delegates may pay by credit card and this is encouraged for overseas delegates. Please note that we only accept MasterCard and Visa. American Express cannot be accepted.

POSTER EXHIBITION
The poster exhibition will be located within the exhibition hall. The posters will be numbered and a list is provided at the back of this programme. There will be an e-poster display area showing all the posters submitted. Posters should be removed by 14:00 on Thursday 9th July. Please note that the British Association of Dermatologists cannot be held responsible for any loss or damage to a poster presented during the Annual Meeting.

REGISTRATION DESK
The registration desk will be located in the entrance to the exhibition and will be staffed by the BAD team during the following hours:
- Monday 6th July: 09:30 – 18:00
- Tuesday 7th - Thursday 9th July: 08:00 – 18:00
Tel: +44 (0)161 827 7605

SATELLITE SYMPOSIA
The following companies will be holding satellite symposia at the meeting:
- Wednesday 8th July
  - 08:00 – 08:45: Charter 4, LEO Pharma, Page 32
  - 13:15 – 14:15: Exchange Hall, Johnson & Johnson, Page 38
  - 13:15 – 14:15: Central 5, 6, 7, La Roche Posay, Page 40
  - 18:00 – 18:45: Exchange 11, Novartis, Page 45
  - 18:00 – 19:45: Charter 4, LEO Pharma, Page 46
- SPEAKER PREVIEW
- There will be a dedicated taxi rank at the front of the venue for pick-ups and drop offs.
- VENUE
- Manchester Central, Windmill Street, Manchester, M2 3GX
- Tel: +44 (0)161 834 2700
- Email: info@manchestercentral.co.uk
- www.manchestercentral.co.uk
- Wi-Fi
- The free Wi-Fi network can be accessed in any part of Manchester Central, via an easy to use, quick, log-in page.

Social Events

**TRAINEE EVENING EVENT**
6 July 2015, Taps Bar  
18:00 - 21:00  
The trainee evening event is a great opportunity to meet with colleagues and network in a relaxed and informal setting. Join us for drinks and food at Taps Bar.

**SAS EVENING EVENT**
6 July 2015, Blackhouse The Grill on the Alley  
19:30 - 22:00  
SAS Doctors are invited to an informal dinner on Monday evening.  
This is a pre-booked event and tickets cost £10.00

**WELCOME RECEPTION**
7 July 2015, Manchester Central  
18:00 - 20:00  
A welcome drinks reception will be held in the Central Foyer, Manchester Central after the final session finishes at 18:00. All attendees are invited to attend. We hope this will be a perfect opportunity to relax, catch up with old acquaintances and form new friendships.

**BSDS DINNER**
7 July 2015, Michael Caines at Abode  
20:00 - 22:30  
The British Society for Dermatological Surgery will hold a drinks reception followed by a fine dining meal at Michael Caines at Abode.  
**FULLY BOOKED**  
Dress code: Black tie

**BSMD CURRY NIGHT**
7 July 2015, Akbars  
20:30 - 22:30  
The British Society for Medical Dermatology are hosting a curry night at Akbars.  
**FULLY BOOKED**

**ANNUAL DINNER**
8 July 2015, Manchester Cathedral  
19:30 – midnight  
The Annual Dinner will be held at Manchester Cathedral. Manchester Cathedral is one of Manchester’s most historical buildings, boasting a heart-stopping beautiful interior awash with historical features and offering an altogether splendorous medieval experience.  
This will offer a wonderful setting for 2015 BAD Annual Dinner and the evening will end with entertainment provided by ‘Under the Covers’.  
Please visit the on-site registration desk to purchase tickets.  
Ticket cost: £60.00 (reduced cost for SAS Doctors: £50.00 and trainees: £40.00)

**PROGRAMME**

15:15 – 15:45

**Guest Lecture**

**Finessing facial reconstruction**

*Professor Jonathan L Cook (Durham, USA)*

The central face has great importance in the visual assessment of attractiveness, and surgical wounds here present tremendous challenges given the aesthetic prominence of central facial features and given the frequent lack of suitable local tissue availability for the repair of larger and more anatomically complicated defects. Improvements in flap design and execution in central facial reconstructive surgery can have dramatically positive influence on the restoration of facial function and appearance following skin cancer removal procedures.

*The attendance of Professor Jonathan Cook to give this lecture has been facilitated by LEO Pharma.*

15:45 – 16:00

**Break**

Exhibition Hall

Guest Lecture: Professor Robert Modlin – Exchange Auditorium

16:00 – 16:30

**DS17**

**Laser hair removal for recurrent pilonidal sinus disease. Does it really work?**

G. Fremlin, K. Kitching, H. McMullin and A. Abdullah

16:30 – 16:44

**DS18**

**The Mohs micrographic surgery database: a 6-year experience with periocular tumours**

S. A. Ho, A. Mitchell, S. Rajpara, A. Affleck and C. Fleming

16:44 – 16:51

**DS19**

**Outcome of ocular Mohs surgery: primary repair versus secondary intention healing**

Y. X. Teo, F. Robinson and S. J. Bashir

16:51 – 16:58

**DS20**

**Treatment of periocular actinic keratosis with topical 5% 5-fluorouracil: a retrospective observational study between 2007 and 2014 in a combined clinic in a single centre**

K. Aljefri, T. Oliphant, E. Barnes and J. Langtry

16:58 – 17:05

**DS21**

**Recombinant protease for cell separation as a safer alternate to trypsin in noncultured epidermal suspension transplantation in stable vitiligo**

A. P. Holla

17:05 – 17:12

**DS22**

**Should additional preoperative precautions and monitoring be performed for skin surgery in patients who have a cardiac rhythm device?**

B. Wright, D. Keith and A. Bray

17:12 – 17:19

**DS23**

**Use of cryogesic spray and cryotherapy for administration of plantar injections of botulinum toxin in epidermolysis bullosa hyperhidrosis**

A. Flynn, R. Watson and R. Barry

**FLAP CORNER**

17:20 – 17:25

**DS24**

**Approaches to reconstructing the ‘goat’ of the ear**

W. Hussain

17:25 – 17:30

**DS25**

**A novel, hinged banner transposition flap for reconstruction of the entire earlobe**

J. Mann, I. Day, R. Mallipeddi and A. Ah-Weng

17:30 – 18:00

**AGM**

**POSTERS**

**DS26**

**Minimizing ectropion and avoiding Mustardé: trilobe flap reconstruction for large defects of the nasojugal fold**

W. Hussain

**DS27**

**Feasibility of a clinical trial investigating surgical management of dermatofibrosarcoma protuberans in the U.K.**

**DS28**

**Development of a Mohs surgery histopathology database**

S.-A. Ho, A. Mitchell, S. Rajpara, A. Affleck and C. Fleming

**DS29**

**Sebaceous carcinoma treated by Mohs micrographic surgery: a review of 14 cases**

K. Kazmierczyk, T. Oliphant, N. Rajan, C. Lawrence and J. Langtry

**DS30**

**The benefit of full-skin examination by dermatologists as a part of strategy to diagnose melanoma early**

N. Ismail, B. Wynne, R. Barry and P. Ormond

**DS31**

**Our experience with the intralesional liquefaction technique to treat large lipomas**

I. Kreuser-Genis, A. Teles and D. Shah

**DS32**

**Mohs micrographic surgery for the treatment of superficial angiomyxoma**

G. Aberdein, D. Veitch and C. Perrett

**DS33**

**Clean enough? Exploring the aseptic behaviours amongst U.K. dermatological surgeons**

T. Nelson, S. El-Heis and A. Sherley-Dale
| DS34 | Score and shave technique for freehand scalpel harvesting split thickness skin grafts: utility in auricular reconstruction  
P. Jayasekera, T. Oliphant and J. Langtry |
| DS35 | Training of advanced skin surgeons: are we making full use of the technology available to us?  
I. Kreuser-Genis, D. Shah and V. Ghura |
| DS36 | Clinical and pathological features of pure and mixed desmoplastic melanomas  
S. Shen, M.J. Lin, J.B. Spillane, C. McCormack and M.A. Henderson |
| DS37 | Who should teach skin suturing?  
E. Pynn |
| DS38 | Skin surgery: ‘a patient’s perspective’  
R. Montgomery and K. Thomson |
| DS39 | Dermoscopic features of rare tumours  
M. Arunachalam and B. Esdaile |
| DS40 | Patient satisfaction of bilobe flap, trilobe flap and island pedicle flap reconstruction of nasal defects after Mohs micrographic surgery  
U. Eke, T.J. Oliphant, J.A. Langtry and C.M. Lawrence |
| DS41 | Trimming a ring at the edge of neoplastic cutaneous head lesions for excision of large tumours: a modified variant of Mohs’ surgery  
F.R. Ali, N.R. Telfer and V. Ghura |
| DS42 | Reconstructing a challenging defect of the antihelix and scapha of the ear: think about rolling over before Antia and Buch  
W. Hussain |
| DS43 | Extranasal application of an interpolated paramedian forehead flap  
W. Hussain |
| DS44 | A successful audit: the improved management of squamous cell carcinoma in a U.K. district general hospital  
N. Dinani, E. McNulty-Brown, C. Mitchell, W.A. Woo, E. Wakefield and J. Hextall |
| DS45 | A simple algorithm for assessment of local anaesthetic allergy in cutaneous surgery?  
G. Parkins, J. Sillars, M. Shepherd, G. Wylie and F. Campbell |
| DS46 | Polarized vs. nondepolarized dermoscopy for common skin lesions  
M. Arunachalam and B. Esdaile |
| DS47 | Chemo-wrapping with topical 5-fluorouracil for treatment of challenging Bowen disease: report of two cases  
N. Ismail, K. Eustace, A. Lally and R. Barry |
| DS48 | To investigate the use of prophylactic antibiotics in patients undergoing skin surgery  
D. O’Callaghan, C. deGiovanni and L. Brendling |
| DS49 | Cetuximab for the management of metastatic cutaneous squamous cell carcinoma in a renal transplant recipient  
S. Ni Raighaligh and A.M. Tobin |
| DS50 | Methotrexate in the management of keloid scars: a novel approach  
R. Nalluri, K. Chakrabarty and M. Harries |
| DS51 | Sebaceous carcinoma: the great masquerader  
A. Bardhan, A. Hartley and H. Al-Rawi |
| DS52 | Incidence of residual tumour in incompletely excised nonmelanocytic malignant skin lesions: an audit cycle completed  
S. Jmor, J. Wilson and A. Lahiri |
| DS53 | Incompletely excised superficial angiomyxoma of the scalp treated by Mohs micrographic surgery  
K. Kazmierczyk, T. Oliphant and J. Langtry |
| DS54 | Periauricular and nuchal epidermal naevi successfully treated with CO2 laser  
R. Nalluri, F. Ali and V. Madan |
| DS55 | Mohs’ micrographic surgery: a needs assessment of patients with basal cell carcinoma attending a large U.K. health care trust  
G. McIntyre, L. McDonald, O. Dolan and O. Kerr |
| DS56 | Dural invasion of scalp squamous cell carcinoma in a cardiac transplant patient  
C. McGrath, M. McBride, A. Rashid, B. Fogarty and A. Corry |
| DS57 | Crossing bridges in nasal reconstruction with V to Y advancement flaps: challenging the hallowed dogma of cosmetic subunit repair  
W. Hussain |
DS58  A unilateral advancement flap for upper eyelid reconstruction: an elegant yet unreported reconstructive option  
N. Anjum and R. Mallipeddi

DS59  Dermatology surgical nurse practitioners: ‘putting in the graft’ to improve efficiency during Mohs micrographic surgery  
C. Machin, J. Parker, D. Norman and W. Hussain

DS60  Audit of malignant melanoma and cutaneous squamous cell carcinoma managed on the treatment pathway for basal cell carcinoma in a regional cancer network  
D. Keith, G. Fremlin and A. Darvay

DS61  Conservative management of a traumatic superficial temporal artery aneurysm  
R. Coelho and C. Grattan

DS62  Plastic surgery–radiotherapy–dermatology (PRD) joint clinic: patient satisfaction on multidisciplinary approach in skin cancer management in a tertiary centre and the impact on waiting times for treatment  
L. Asfour, Z. Jiyad, S. Lalondrelle, B. Powell and V. Akhras

DS63  Pigmented lesions: experience matters  
A. Brown, C. Bower and E. McGrath

DS64  Three point-advancement closure  
K. Duncan, S. Ho, C. Fleming and S. Rajpara

DS65  Periocular skin surgery: investigating case mix and outcomes across specialties at a regional teaching hospital  
E.J. McGrath and A. Brown

DS66  Metastatic papillary thyroid carcinoma in a patient with multiple eruptive squamous cell carcinomas  
S. Ní Raghallaigh and A.M. Tobin

The poster viewing session will take place between 13:30 and 14:00 on Tuesday 7th July

</thead>
</table>
| 14:00 – 14:30 | Guest Lecture – Introduced by Professor Irene Leigh | The dermatologist and the HIV/AIDS pandemic  
Professor Erwin Tschachler (Vienna, Austria)  
The history of the AIDS pandemic is invariably linked to dermatology, because it was clusters of patients with diseases of the skin and mucous membranes like candidiasis that helped to identify this new disease entity. Thirty five years later the clinical course of HIV disease has changed dramatically due to insights into the disease pathogenesis and the boost of antiretroviral drugs that break the vicious circle of viral propagation and damage to the immune system. However, also today identification of sentinel skin and mucous membrane conditions of either primary HIV infection or advanced HIV disease by dermatologists are crucial to help curbing the spread of the virus and initiating timely antiretroviral therapies. |
| 14:30 – 14:45 | O01 U.K. patient cases from the global single-arm, open-label, multicentre STEVIE study of the hedgehog pathway inhibitor vismodegib in patients with advanced basal cell carcinoma  
| 14:45 – 15:00 | O02 Hard domestic water increases the risk of developing infantile eczema by 3 months of life  
| 15:00 – 15:15 | O03 The atypical chemokine-scavenging receptor ACKR2 prevents psoriasiform pathology by defining the boundaries of T-cell localization within the skin  
K. Shams, M. Le Brocq, M. Kurowska-Stolarska, C. McKimmie, D. Burden and G. Graham |
| 15:15 – 16:00 | Break Exhibition Hall |
| 16:00 - 16:30 | Guest Lecture – Introduced by Professor Irene Leigh  
Learning from Leprosy: An Excellent Adventure  
Professor Robert Modlin (Los Angeles, USA)  
The goal of our research is centered on the study of leprosy as a model to learn about mechanisms of immune regulation in skin in humans. As such, our laboratory has made fundamental insights into T cell subsets, cytokine patterns, antigen presentation, innate immunity and antimicrobial mechanisms in the cutaneous immune response to infection. A more recent is the elucidation of the mechanism by which vitamin D contributes to innate immunity against infection in humans, providing a rationale for supplementation in deficient individuals. |
| 16:30 – 16:45 | O04 Acute stress and cutaneous mast cell function  
H.J.A. Hunter, O. Orekoya, C.E.M. Griffiths and C.E. Kleyn |
| 16:45 – 17:00 | O05 Incidence and management of skin-related adverse events associated with vemurafenib in BRAF V600E-positive metastatic melanoma: a 3-year retrospective cohort study of 107 patients  
R. Sinha, J. Larkin, M. Gore and L. Fearfield |
| 17:00 – 17:15 | O06 The 10-year clinical outcomes of reduced-intensity allogeneic stem cell transplantation for patients with advanced-stage mycosis fungoides and Sézary syndrome  
| 17:15 – 17:30 | O07 Predicting factors influencing facial atrophic scarring in acne  
P. Kadiyala, A. Layton, K. Wartburton, R. Bhutani, E. Fryat and V. Allgar |
| 17:30 – 17:45 | O08 Ambient and sunbed ultraviolet radiation exposure: exposure rates, protection habits and attitudes of Irish teenagers aged 14–18 years before introduction of national sunbed legislation  
M. Fitzgerald, S. Daly, D. McKenna, J. Bourke and A. Kelly |
**British Society for Dermatopathology**

**Date:** Tuesday 7th July  
**Time:** 14:30-18:15  
**Room:** Central 5,6,7

<td>The age in which new entities could be discovered by the examination of hematoxylin and eosin stained slides has largely come to a close, with the only truly new conditions being ones induced by new therapies, or nano-variants of existing entities. However, our understanding of many conditions is changing as new techniques are applied to them. This lecture will present a mixture of the two, as we consider the granulomatous variant of persistent pigmented purpuric dermatitis, keratosis lichenoides chronic, multinucleate cell contusiform dermopathy, ancient nevus, atypical fibrous histiocytoma and others.</td>

</table>

Epithelial skin cancer is a frequent event in the ageing population. The main external driving factor is sun damage, mainly mediated by ultraviolet light. The main endogenic factors comprise race and skin type. Mechanisms of skin cancer involve DNA damage and defective damage repair in the epidermis. Damage to the dermis probably matters more than previously thought. Key cellular pathways such as Notch, WNT and Hedgehog contribute to skin cancer formation once they are disturbed. Drugs contribute to skin cancer formation as do special settings such as systemic immunosuppression. Prevention includes sun protection and selective pathway inhibition.

POSTERS

| INT01 | Palmar and flexural hypertrophic lupus erythematosus: an extremely rare variant of discoid lupus erythematosus | S. Manupati, A.K. Metta and R. Subramanyam |

**LA ROCHE-POSAY ANTHELIOS XL**  
Very high sun protection, specifically designed for sensitive skin.

Over the last 30 years, La Roche-Posay has developed unique expertise in sun protection and established its pioneering Anthelios range offering very high UVA/UVB protection, as the «go-to» sun protection range for sensitive skin. **Anthelios XL Cream SPF50+** has been reformulated to contain Baicalin, an anti-oxidant.
The Inflammasome, Autoinflammation and Skin Disease
Professor Lars French (Zurich, Switzerland)

Autoinflammatory diseases - a newly classified subset of diseases that are pathogenetically and clinically distinct from allergic or autoimmune diseases - are characterised by seemingly unprovoked episodes of inflammation, the frequent presence of sterile neutrophilic tissue inflammation and in certain instances dysregulation of interleukin (IL)-1β production. Several autoinflammatory diseases are monogenic and caused by mutations in genes regulating the function of cytoplasmic innate immune complexes, termed inflammasomes, resulting in enhanced secretion of the proinflammatory cytokine IL-1β. Recent experimental evidence also points to a role of the inflammasome and IL-1β in more common acquired inflammatory skin and systemic diseases characterised by an altered pathogen-host interaction or a biological response to endo- and/or exogeneous danger signals. Finally, given that overactivation of the innate immune system leading to increased production of IL-1 family members and “sterile”neutrophil-rich cutaneous inflammation are features of both selected inherited autoinflammatory syndromes with skin involvement and an increasing number of neutrophilic dermatoses, it is postulated that autoinflammation may also underly the pathogenesis of neutrophilic dermatoses.

This lecture has been funded by an educational grant provided by Stiefel, a GSK company. Stiefel have had no involvement in the speaker selection or content of this lecture.

PS15  Psychosocial well-being and quality of life in rosacea: a systematic literature review  M. Krasuska, A. Millings, A. Lavda and A. Thompson

PS16  Quality of life in Irish female patients with lichen sclerosus  E.N. Dhonncha, C. Foley and P. Marren

PS17  Cutaneous self-inflicted injury in the context of mental health disorder  N. Watson, R. Gardner and C. Jury

PS18  ‘It’s a traumatic illness, traumatic to witness.’ A qualitative study of the experiences of bereaved carers of patients with cutaneous T-cell lymphoma  D. Orlowska, R. Harding, T. Beynon, L. Selman, E. Radcliffe, F. Child and S. Whittaker

PS19  Abstract withdrawn

PS20  A unifying psychodermatological diagnosis in two sisters  S. Ngu, R. Gardner and C. Jury

PS21  Primary seborrhoea treated with oral isotretinoin: effective but hard to stop  C.-H. Tan and A. Affleck

The poster viewing session will take place between 16:20 and 16:45 on Wednesday 8th July
The big question for biologics: A first-line systemic therapy for psoriasis?

Speaker for: Dr Mark Goodfield, Consultant Dermatologist, Chapel Allerton Hospital, Leeds
Speaker against: Professor Nick Reynolds, Professor of Dermatology, Newcastle University, Newcastle upon Tyne
Moderated by: Dr Sarah Jarvis, General Practitioner & Medical Broadcaster, London

Current therapeutic approaches to autoimmune bullous diseases accompany with general immune suppression. An ideal therapeutic approach is to target pathogenic immune cells specific for autoantigens, but not normal cells. To achieve the eternal goal, we have been trying to first understand how pathogenic T and B cells are eliminated in normal individuals using pemphigus as a disease model. Our body has a quite ingenious system to avoid the dangerous autoimmune reaction. The deeper we go, the more beautiful the nature becomes.
### BADGEM Clinical Meeting

**Date:** Thursday 9th July  
**Time:** 08:30 – 12:00  
**Room:** Exchange Hall

#### POSTERS

| BG06 | Prospective Epidermolysis Bullosa Longitudinal Evaluation Study (PEBLES): development of an electronic data capture tool in recessive dystrophic epidermolysis bullosa | E. Pillay, S. Robertson, A. Martinez and J. Mellerio |
| BG08 | Farber disease: an unusual case in a dermatology clinic | P. Gupta and P. Beattie |
| BG09 | Two cases of patients with Ehlers–Danlos syndrome type VIII and hoarseness | S. George, A. Vandersteen, E. Nigar, D. Ferguson, E. Topham and F.M. Pope |
| BG10 | Chromosome 3 partial triplication in association with pigmentary mosaicism | R. Waas, M. Splitt and S. Leech |
| BG11 | Two cases of rare variants of dystrophic epidermolysis bullosa with late onset of symptoms  
W. Szczecinska and A. Heagerty |
| BG12 | A second family with a telomerase reverse transcriptase (TERT) promoter gene mutation associated with melanomas  
| BG13 | Full-thickness skin grafting for pseudoainhum in loricrin palmoplantar keratoderma  
P. Broadbent, S. Turner and M. Zamiri |
| BG14 | Neurofibromatosis type I or Legius syndrome? An emerging diagnostic challenge  
W.Y. Haw, V. Harrison, M. Oakford and K. Godfrey |
| BG15 | Deafness and a recurrent erythrokeratoderma-like rash with marked perineal involvement, due to a heterozygous mutation in GJB2 (connexin 26, F142L)  
M.-L. Lovgren, J. Robinson, A. Terron-Kwiatowski, D. Baty, M. Zamiri and A. Waters |
| BG16 | New missense mutation in type VII collagen in an adult with autosomal recessive pretibial epidermolysis bullosa  
L. Cunningham, L. Liu, S. Menzies, J.A. McGrath and A. Lally |
| BG17 | Linear skin defects and microphthalmia: a case report  
A. Durack, N. Burrows and S. Mehta |
| BG18 | Cystic fibrosis carrier status presenting with aquagenic palmar wrinkling  
A. Durack, A. Sterling and P. Todd |

The poster viewing session will take place between 13:00 and 13:30 on Thursday 9th July
PROGRAMME

08:30 – 08:42 PD01 Paediatric solar urticaria: a case series  
A. Fityan, H. Fassihi, D. McGibbon and R. Sarkany

08:42 – 08:54 PD02 Solar urticaria: an examination of the action spectra in 125 patients  
D. Koumaki, A.K. Haylett, M.D. Farrar, T.C. Ling and L.E. Rhodes

08:54 – 09:06 PD03 The use of omalizumab in three patients with solar urticaria  
M. Sivaramakrishnan, C. Morton, T. Wong, S. Laube, R. Dawe and S. Ibbotson

09:06 – 09:41 PDGL1 Guest Lecture  
SLE: an update  
Professor David D’Cruz (London)

09:41 – 10:16 Diagnostic conundrums in the photosensitive patient  
Professor James Ferguson (Dundee)

This clinical presentation will focus on patients seen at a specialist “Photo” clinic. Emphasis is placed on the value of appropriate investigations including photoprovocation, photopatchtesting and plasma porphyrin scanning.

Individual cases have been selected to illustrate the range of photodermatoses, occasionally at times confusingly, seen in combination. Clinical variants that pose diagnostic and treatment challenges will be looked at closely.

The challenge for the coming decade is to reduce the number of missed or incorrectly diagnosed patients. A simplified easy to use LED phototest approach, more readily available in non phototest centres, may go some way to improving patient care in the future.

10:16 – 10:28 PD04 Solar urticaria occurring in two patients with erythropoietic protoporphyria: a pointer to an endothelial antigen in solar urticaria?  
A. Tewari, A. Fityan and R. Sarkany

10:28 – 10:45 Break Exhibition Hall

10:45 – 10:57 PD05 Retrospective review of the efficacy of psoralen–ultraviolet A and narrowband ultraviolet B in the management of generalized granuloma annulare  
L. Cunningham, B. Kirby, A. Lally and P. Collins

10:57 – 11:09 PD06 White light-emitting diode topical methyl 5-aminolaevulinate photodynamic therapy: a novel treatment option that is as effective and well tolerated as daylight photodynamic therapy for the treatment of actinic keratoses  

11:09 – 11:21 PD07 High cumulative doses of narrowband ultraviolet B (NB-UVB) in vitiligo: none of a group of 48 patients receiving over 100 NB-UVB treatments developed skin cancer in the medium term  
S. Momen and R. Sarkany

11:21 – 11:33 PD08 Variegate porphyria in a child with developmental delay  
V. Dvorakova, Q. Razali, V. Crowley, S. Savage, D. Webb, J. McBrien and R. Watson

11:33 – 12:00 AGM

POSTERS

PD09 Do photosensitizing drugs pose a significant risk of adverse reaction to TL01 ultraviolet B?  
S. McCarthy and J.F. Bourke

PD10 Retrospective study to assess the effect of skin cooling on the outcome of photodynamic therapy for Bowen disease and superficial basal cell carcinoma  
G. Roberts, D. Turner and V. Goulden
| PD11 | Late diagnosis of xeroderma pigmentosum variant in an elderly patient with skin type V  
W. Szczecinska and M.R. Kaur |
| PD12 | Poster withdrawn |
| PD13 | Out of the frying pan and into the fire  
M.-L. Lovgren, I. Taggart and D. Bilsland |
| PD14 | A case of recalcitrant solar urticaria successfully treated with omalizumab  
M.F. Chin, A.V. Anstey and J. Hughes |

The poster viewing session will take place between 13:00 and 13:30 on Thursday 9th July
British Society for Skin Care in Immunocompromised Individuals

**Date:** Thursday 9th July  
**Time:** 13:15 – 17:30  
**Room:** Charter 4  
**Chair:** Dr Nilesh Morar & Dr Helen Ramsay  
Dr John Lear & Professor Chris Bunker

Langerhans cell histiocytosis: a mimic of scabies in children
K. Eustace, B. Pizer, J. McPartland and A. Alsharqi

An audit to assess the management of paediatric dermatology patients taking immunosuppressants
E. Rudd and S. Baron

Segmental pigmentary anomaly and ataxia telangiectasia
D. Jain and S. Natarajan

Sniffing out a diagnostic dilemma: TB or not TB?
A. Gulati, J. Gale, A. Prendergast, R. Cerio and S. Dhoat

The poster viewing session will take place between 13:00 and 13:30 on Thursday 9th July
Continuing Professional Development Session

Date: Thursday 9th July
Time: 13:45-17:30
Room: Exchange Auditorium
Chair: Dr David Eedy & Professor Irene Leigh

NOTES
### Focus Sessions

Date: Thursday 9th July  
Time: 15:30 – 16:00  
Room: Central 5,6,7  
Chair: Dr Paul Farrant & Dr Matt Harries

An update on scarring and non-scarring hair loss

| 15:30 – 15:45 | FS1 | What's new in non-scarring hair loss?  
Dr Paul Farrant (Brighton) |
|----------------|-----|-------------------------------------|
| 15:45 – 16:00  | FS1:2 | What's new in scarring hair loss?  
Dr Matt Harries (Manchester) |

### Pregnancy Dermatoses

Date: Thursday 9th July  
Time: 15:30 - 16:00  
Room: Exchange 1  
Chair: Dr Ophelia Dadzie

| 15:30 – 15:45 | FS2 | Skin Diseases in Pregnancy  
Dr Samantha Vaughan Jones (Chertsey, Surrey) |
|----------------|-----|-------------------------------------|
| 15:45 – 16:00  | FS2:1 | Cases from the Pregnancy Skin Clinic  
Dr Samantha Vaughan Jones (Chertsey, Surrey) |

### Ethnic Skin

Date: Thursday 9th July  
Time: 15:30 - 16:00  
Room: Exchange 11  
Chair: Dr Ophelia Dadzie

| 15:30 – 15:40 | FS3 | Introduction: Ethnic Dermatology in the UK  
Dr Ophelia E. Dadzie (London, UK) |
|----------------|-----|-------------------------------------|
| 15:40 – 15:50  | FS3:1 | Ethnic Skin: Semiology from a different perspective  
Dr Antoine Petit (France) |
| 15:50 – 16:00  | FS3:2 | Practical Tips For Clinical Practice: Focus on PFB and FKN  
Dr Andrew F. Alexis (USA) |
Poster Presentations

These presentations will take place at the back right hand corner of the Exhibition Hall. Please see the abstract supplement for full abstracts in poster number order.

The posters are situated within the exhibition hall. The poster viewing session will take place during the lunch breaks on Tuesday (even numbered posters) and Thursday (odd numbered posters). All presenting authors have been asked to stand by their posters at this time. There will also be an e-poster display within the exhibition hall.

**Clinicopathological Cases**

**P01** Onycholysis masquerading as subungual squamous cell carcinoma  
C. Kwok and A. Ong

**P02** Cutaneous involvement as a late manifestation of adult-onset Langerhans cell histiocytosis  
K.H. Kuet, N. Tiffin, J. Wright and A. McDonagh

**P03** Warfarin-induced skin necrosis and calciphylaxis: a diagnostic challenge  
P. Babakinejad, N. Arunjuna and E. Derrick

**P04** Metastatic Crohn disease in the setting of multiple sclerosis  
E. Storan, L. Aalto, A. Hussey, L. Egan, L. Gaffney and T. Markham

**P05** Lichenoid pseudovesicular papular eruption on the nose: a new entity or a new variant of an existing dermatosis?  
S. Singh, M. Ramam, A. Singh, S. Arava and S. Mallick

**P06** Proton pump inhibitor-induced and -exacerbated subacute cutaneous lupus erythematosus  
E. Higgins, R. Groves, B. Martin, S. Sangle, D. McGibbon, D. O’Cruz and E. Benton

**P07** TB or not TB? That is the question: a case of unilateral leg ulceration in an immunocompetent man  
S. Benedict and N. Stone

**P08** Postirradiation morphea and interstitial granuloma annulare  
R. Nalluri, R. Green and D. Fitzgerald

**P09** Actinic granulomas in a patient with poorly controlled diabetes  

**P10** An unusual and potentially fatal cause of scalp crusting  
Y. Estfan, M. Saha, R. Healy and H. Trinh

**P11** Palisaded neutrophilic granulomatous dermatitis: a recognizable clinical pattern in five patients  
S. Ziaj, B. Martin, D. O’Cruz, S. Sangle, E. Benton, H. Fassihi, R. Sarkany and D. McGibbon

**P12** Basal cell carcinoma and skin breast metastasis: a unique collision tumour  
J. Brockley, P. Hiley and W. Machado

**P13** Painful leg ulcers  
E. Storan, L. Aalto and M. Laing

**P14** Calciphylaxis: more common than we think?  
S. Menzies, P. Collins, B. Kirby, J. Holian and A. Lally

**P15** Paradoxical exacerbation of chronic plaque psoriasis by sorafenib  
Z. Yu, F. Ali and C.E.M. Griffiths

**P16** Blastic plasmacytoid dendritic cell neoplasm  
S. George, T. Rider, H. Tidbury, R. Grace, Z. Ali and J. Felton

**P17** Poliosis secondary to halo naevi on the scalp  
P.R. Ragahavendran and D.G. Stewart

**P18** A case report of giant melanoma: a rare clinical variant of cutaneous malignant melanoma  
S. Anthony, K. Muttardi, V. Swale, N. Krassilnik, A. Rubin, K. Batta and F. Tatnall

**P19** Urticarial vasculitis following commencement of etanercept for psoriasis  

**Education, Training, Service, Audit**

**P20** An assessment and comparison of pharmacists’ and dermatologists’ knowledge about the safety and efficacy of topical corticosteroids in paediatric atopic dermatitis: a source of topical corticosteroid phobia  
S. Smith, A. Lee, A. Blaszczyński and G. Fischer

**P21** Educational video for patients undergoing Mohs micrographic surgery: a randomized controlled trial  
J. Mann, E. Kulakov, C. Duhovic, J. Hafiji, P. Bassett, A. Cooper and A. Birnie

P. Balasubramaniam, S. Cheung, A. Bishop-Bailey, R. Williams and C. Hatchard

**P23** Allergic contact dermatitis in children: trends in allergens, 10 years on. A retrospective study of 500 children tested between 2005 and 2014 in one U.K. centre  
V. Smith, S. Clark and M. Wilkinson

**P24** Efficacy of extracorporeal photopheresis in chronic cutaneous graft-versus-host disease: a retrospective study  
N. Alband, S. Saglam, T.N. Basu and F.J. Child

**P25** Are there sufficient numbers of low-risk basal cell carcinomas to justify primary care surgery services?  
G. Fremlin and J. Haipern

**P26** Management of melanocytic tumour of uncertain malignant potential over 5 years (2009–2014)  
C. Cunningham, P. Divekar, R. Hohle, R. Jenkins, I. Hopkins and A. Dengler

**P27** The impact of SIGN 140: audit of high-risk SCC using a year’s data in three health boards  
R. Hayhurst, K. Duncan, F. Craig, A. Bonsall, M. Mowbray and A. Holme

**P28** Dermatological content of U.K. undergraduate curricula: where are we now?  

**P29** Experience of a regional dermatology teaching programme: a step to improving undergraduate dermatology teaching in the U.K.  
A. Wernham, J. Carr and A. Daunton
P30 ‘Washout’ period for oral tetracycline antibiotics prior to systemic isotretinoin
D. Caruana and G. Wylie

P31 Stripping down to the bare facts: the importance of full-skin examination in the diagnosis of malignant melanoma
E. Akufo-Tetteh, C. Wong, L. Black and A. Harris

P32 The spectrum of skin diseases in a multiethnic population in an urban setting in the U.K.
A. Banner, M. Disney and O. Dadzie

P33 Melanoma Diagnostic Index: comparative data to determine diagnostic sensitivity
S. Benedict, C. Mills and N. Stone

P34 A regional audit of the management of onychomycosis in secondary care
J.C. Wong and L. Stewart

P35 Virtual dermatology clinics introduced in a teaching hospital: a service evaluation audit of a new service
B. Shaheen and K. Harman

P36 Acute inpatient dermatology: is a dermatologist really necessary?
R. Fisher, J. Dua and R. Clayton

P37 Acne reaudit with emphasis on primary care referral patterns
K.E. Davies, A. Steen and P.D. Yesudian

P38 What’s app in dermatology?
G. Garrett, N. Sabouni and R. Morris-Jones

P39 Effectiveness and safety profile of prescribed double-dose antibiotics
H. Dilworth and G. Dawn

P40 A review of dermatology primary care referral letters
R. Fisher and S. Walsh

P41 The use of the British Association of Dermatologists’ app in a clinical setting: a student’s perspective
E. Carras, S. Rasool and I. Helbling

P42 Safety of topical retinoids in women of childbearing age
D. Caruana and G. Wylie

General Dermatology

P43 Differential neural response in patients with psoriasis: a functional magnetic resonance imaging study
E.L. Mullings, S. McKie, L. Griffin, C.E.M. Griffiths, R. Elliott and C.E. Kleyn

P44 Loss of work productivity and quality of life in patients with autoimmune bullous dermatoses
K. Heelan, S. Walsh and N.H. Shear

P45 Poster withdrawn

P46 Ebola: diagnosis and dermatology
C. Ondhia and N. Levell

P47 A systematic review of the natural history of recessive dystrophic epidermolysis bullosa
J. Mellerio, S. Robertson, E. Pillay, J. Denyer, E. Wedgeworth, E. Batten and A. Martinez

P48 Penoscrotodynia is a somatoform disorder and requires psychiatric treatment
M.C. Anyasodor, J.M.R. Goulding and A. Bewley

P49 Insulin resistance and indices of insulin sensitivity in patients with hidradenitis suppurativa

P50 Antitumour necrosis factor agents and lupus-like syndromes: a Critically Appraised Topic
S. Momen, B. Kirkham, J. Barker and C. Smith

P51 Uncommon presentation of Hansen disease: a case series
G. Sawatkar, T. Narang, S. Dogra, K. Vinay and U. Saikia

P52 Framingham Risk, Q-Risk and cardiovascular risk factors in hidradenitis suppurativa: a case–control study

P53 Barriers to cardiorespiratory fitness in patients with chronic plaque psoriasis
L. Auker, L. Cordingly, K. Kane, C.E.M. Griffiths and H. Young

P54 A novel method of real-time quantification of skin-scale density demonstrating the effect of a basic skincare regimen
A. Wernham, O. Cain, and A. Thomas

P55 Chronic urticaria: guidelines, diagnosis and management
C.-H. Wu, M. Ardern-Jones, E. Efrem and C. Venter

P56 Smoking and scarring severity in acne
R. Bhutani, P. Kadiyala, E. Fryatt and A. Layton

P57 Mycobacterium chelonae outbreak following tattoo shading
S. Benedict, L. Nehaul and N. Stone

P58 A decade later, has the prevalence of skin colonization by resistant propionibacteria increased in our patients with acne?
K.H. Kuet, C. Finch, E. Fryatt, A. Eady and A. Layton

P59 Outpatient discharge decision taking: patients’ perspectives challenge current practice
N.A. Harun, A.Y. Finlay, V. Piguet and M.S. Salek

P60 Longevity of biological drug effect in patients with psoriasis: results from a retrospective U.K. study
H. Audrain, A. Trickey, I. Colville, S. Brar and G. Dunnill

P61 Psoriasis Area and Severity Index correlates with circulating levels of insulin, irrespective of body mass index or waist circumference
R. O’Connor, R. Hellen, B. Kirby and A.-M. Tobin

P62 An observational study to investigate health-seeking behaviour in patients with psoriasis using framework analysis
J.K. Simpson, S.R. Mcbride, M. Wilson, A.A. Ahmed and A. Mizara

P63 The utility of patient ‘selfies’ to aid dermatological diagnoses
M. Rajpopat, M. Krupiczocj and V. Swale

P64 The implications of underlying anxiety and depression in patients with psoriasis: understanding the patterns of biological therapy use and treatment outcomes during standard U.K. clinical care (PICTURE study)
A. Bewley, A. Bishop-Bailey, R. Williams and C. Hatchard
P65 Four cases of unusual marginal alopecia presenting to two tertiary hair clinics
W. Szczecinska, M.R. Kaur, R. Muc and M.J. Harries

P66 Hailey–Hailey disease linked to bipolar affective disorder
J. Brockley and K.A. Ward

P67 Toxic epidermal necrolysis secondary to deferasirox confirmed by in vitro drug hypersensitivity testing
E. Seccombe, C. Mitchell, C.J. Ward, M. Polak, M. Ardern-Jones, H. Cooper and N. Anjum

P68 Retrospective case-note review of chronic spontaneous urticaria outcomes and adverse effects in patients treated with omalizumab or ciclosporin in U.K. secondary care
S. Savic, A. Marsland, D. McKay, M. Ardern-Jones, T. Leslie, O. Somenzi, L. Baldock and C. Grattan

P69 Elastodystrophic naevus: a newly described entity
D.Y.L. Tang and S. Natarajan

P70 Isolation of Mycobacterium iranicum, a novel species, from the cutaneous lesions of a patient in the U.K.
E. Carras, J. Osborne, M. Wiselka and G. Johnston

P71 Twenty years on APSEA still hits the spot: validation of the Assessment of the Psychological and Social Effects of Acne (APSEA) questionnaire in a large cohort of patients with acne
S. Ladbrooke, C. Finch, E. Fryatt, V. Allgar, A. Eady and A. Layton

P72 ‘Stroking’ the surface: unilateral psoriasis following a cerebral vascular accident
T.H. Tan and P.D. Yesudian

P73 Insulin resistance and the metabolic syndrome in hidradenitis suppurativa
G. Kelly, C. Sweeney, R. Hughes, R. Fitzgerald, A. Lally, A.-M. Tobin and B. Kirby

P74 Legal claims in Scottish National Health Service dermatology departments 2002–13
M.-L. Lovgren, L. McCrae and A. Drummond

P75 Additional diagnoses in the rapid-access clinic: the benefits of full-skin examination
M. Krupiczojc, A. Lock, A. Milligan, S. Aguilar and V. Swale

P76 Erythroderma of uncertain origin: an age-related phenomenon?

P77 Attitudes towards sun exposure in patients with inflammatory bowel disease taking azathioprine
E. Gilhooley, A. Fareley, M. Connolly and A.-M. Tobin

P78 What is the relationship between acne and smoking?
R. Bhutani, A. Eady and A. Layton

History

P79 The ‘mole men’: the doctors who have shaped our diagnosis of melanocytic lesions
S.A. Chan, W. Szczecinska, N. Harper, A. Bardhan, A. Heagerty and S. Orpin

Skin Cancer

P80 Residual melanoma in wide local excision specimens

P81 Network analysis identifies master regulators of metastasis in cutaneous melanoma
S. Smith

P82 Is an online skin cancer toolkit an effective way to educate primary care physicians about skin cancer diagnosis and referral?
A. Gulati, C.A. Harwood, N. Goad, J. McGregor and C. Proby

P83 Evaluation of Malignancies in the Psoriasis Longitudinal Assessment and Registry (PSOLAR)
D. Fiorentino, M. Lebwohl, V. Ho, R. Langley, K. Goyal, S. Fakharzadeh, S. Calabro and W. Langholf

P84 Skin toxicity and oedema in metastatic melanoma treated with mitogen-activated protein kinase inhibitors

P85 Dermoscopy of amelanotic nodules
M.J. Lin, C. Jallilian, Y. Pan and J.W. Kelly

P86 Merkel cell carcinoma: rising incidence in the U.K.
P. Goon, L. Igail and N. Level

P87 Comparison of pathways to diagnosis of nodular melanoma and superficial spreading melanoma
M.J. Lin, M. Cicchiello and J.W. Kelly

P88 Retrospective study of vulval basal cell carcinoma
R. Atkar and P. Todd

P89 Management of squamous cell carcinoma: our experience
P. Gupta and G. Gupta

P90 The incidence, clinical features and prognosis of cutaneous metastatic disease in patients with solid malignant tumours
O. Mikheeva, A. Seryakov and I. Lamotkin

P91 Palliative radiotherapy for Merkel cell carcinoma: single-centre experience and review of the literature
A. Shah, B. Kangaratanam and G. Anand

P92 A comparative study examining the management of squamous cell carcinoma in situ (Bowen disease) in the U.K. and Australia
G. Morley, G. Thom and I. Verpetinske

Therapy

P93 Adapalene/benzoyl peroxide fixed-dose combination for the prevention and treatment of atrophic acne scars

P94 Modelled analysis of serious infection risk in the treatment of psoriasis with biologics and systemic treatments in the Psoriasis Longitudinal Assessment and Registry (PSOLAR)
P95 Fumaric acid esters for psoriasis: Cochrane systematic review
A.A. Atwan, J.R. Ingram, R. Abbott, M.J. Kelson, T. Pickles, A. Bauer, C. Taylor and V. Piguet

P96 Immune responses in contact immunotherapy with diphenylcyclopropenone
C. Hadjadiene, C. Lai, P. Friedmann and E. Healy

P97 Interim analysis of Dipeptidyl Peptidase-4 Inhibition and Narrow-band Ultraviolet-B Light in Psoriasis (DINUP): a randomized controlled trial

P98 Treatment of moderate-to-severe atopic eczema in adults within the U.K.: results of a national survey
K. Taylor, D. Swan, A. Affleck, C. Flohr and N. Reynolds

P99 Adapalene 0.3%/benzoyl peroxide 2.5% topical gel: efficacy and safety in moderate and severe acne vulgaris
J. Weiss, L. Stein-Gold, E. Tanghetti, C. Dujols, M. Leoni and T. Downs

P100 Apremilast demonstrates consistent efficacy across Dermatology Life Quality Index subgroups: an analysis of clinical trial data
F. Mughal, F. Zhang, S. Li and T. Tencer

P101 Poster withdrawn

P102 Successful treatment of pyoderma gangrenosum with the interleukin-1 receptor antagonist anakinra: a case series of three patients
M.F. Chin, C.R. Beynon, T. Lawson, P. Hunasehally, K. Bhagwandas and M. Bevan

P103 White light-emitting diode topical methyl 5-aminolaevulinate photodynamic therapy: a novel treatment option that is as effective and well tolerated as daylight photodynamic therapy for the treatment of actinic keratoses

P104 Split-face placebo-controlled study to evaluate the efficacy of type a botulinum toxin in postacne facial scars
A. Sarkate, S. Ghate and R. Dhurat

P105 Management of hidradenitis suppurativa: a U.K. survey of current practice
J.R. Ingram and M. McPhee

P106 Comparison of the efficacy and safety profiles of topical bimatoprost 0.03% in combination with narrowband ultraviolet B (NB-UVB) vs. NB-UVB alone in the treatment of vitiligo: a 24-week prospective right–left comparative clinical trial
G. Khullar, S. Sharma, D. Parsad and M.S. Kumaran

P107 Quantifying radiant exposure of daylight and white light-emitting diode (LED) light used to treat patients with actinic keratoses with topical methyl 5-aminolaevulinic acid photodynamic therapy (PDT), and comparison with two conventional red-light LED PDT sources
M. Manley, J. McCavana, L. Gray, S. O’Gorman and P. Collins

P108 Dermatology Quality Life Index (DLQI) responses to biological therapy for psoriasis during standard U.K. clinical care: NICE assessment timelines may not capture the best DLQI response (PICTURE study)
A. Bishop-Bailey, A.Y. Finlay, C. Hatchard and R. Williams

P109 Retrospective review of the efficacy of psoralen–ultraviolet A and narrowband ultraviolet B in the management of generalized granuloma annulare
L. Cunningham, B. Kirby, A. Lally and P. Collins

P110 Does spironolactone have a place in the treatment of acne in female patients?
I. El-Mansori, E.A. Eady and A.M. Layton

P111 Itolizumab, a unique upstream immunomodulator in the treatment of psoriasis: in-clinic experience
G.S. Pai, A. Parthsaradathy, A.H. Pai and N. Sashidharan

P112 Identifying key components for a psychological intervention for people with vitiligo

P113 Trends in antibiotic resistance patterns of Staphylococcus aureus isolates from dermatology patients in the U.K. over 12 years
A. Sears, M. Rossabi, N. Desai, J. Wade, R. Hay and R. Morris-Jones

P114 Clinicopathological study of epidermal growth factor receptor inhibitor-induced papulopustular lesions
C.-K. Hsu, C.-C. Yang, K.-Y. Chang, T. Falesa, E. Calonje and J.Y.-Y. Lee

P115 Naltrexone: a novel treatment for Hailey–Hailey disease
C. McGrath, K. Holte and A. Corry

P116 Assessment of a visual risk communication aid used to support patients in deciding about biological therapy

P117 Prospective study of the use of daylight photodynamic therapy for the treatment of actinic keratoses in Ireland
C. Quinlan, V. Shutchaidat, N. Browne and G. Murphy

P118 Association of topical psoriasis treatment with subsequent disease worsening or secondary care referral: analysis of a U.K. general practice database
S. Zokaie, A. Moeller, M.M. Romano Rodriguez and C. Gibbons

P119 Monitoring patients with hidradenitis suppurativa on rifampicin and clindamycin combination therapy
G. Parkins, J. Sillars, G. Wylie and A. Drummond

P120 Caution with botulinum toxin A in the treatment of hyperhidrosis in a patient with congenital myasthenic syndrome
S. El-Heis, G. Burke, W. Gibb and M. Ardem-Jones

Richard B. Stoughton Memorial
Treatment of Alopecia Areata in Children with Topical 5% Squirac Acid Dibutylester
M. Vatanchi, A.A. Hebert
Hot Topics

They will be semi-informal set-up taking place is two designated areas within the Exhibition Hall during breaks. These are highlighted as HT1 and HT2 on the exhibition plan.

**TUESDAY 7th July – morning break**

<table>

General Information

DELEGATE BAGS

The Conference & Events Department is aiming to limit the impact the Annual Meeting has upon the environment.

Conferences and exhibitions provide a huge amount of waste and this year we aim to continue to implement measures to improve this.

Following feedback from previous meetings delegates will be provided with a generic delegate bag (as illustrated). This bag is made from recycled plastic bottle and has the BAD Logo on the side.

We have made a decision not to include a sponsor, date or annual meeting destination. This will enable you to reuse the bag for other annual meetings as well as other BAD meetings. We hope this will become your BAD ‘Bag for Life’.

If you have a bag from a previous annual meetings please bring it with you.

EVALUATION FORM

This year’s evaluation form will be on-line and all attendees will be sent a link after the meeting.

Thank you in advance for taking the time to complete it, as it is an invaluable tool for us in organising future meetings.
