

Introduction to Photodermatology, Photodynamic Therapy & Laser Therapy Virtual Course

Photobiology Unit, Ninewells Hospital, Dundee, Scotland

The course has been approved for **20** Distance Learning CPD credits by the Royal College of Physicians. The expiry date for CPD approval is October 2021 (**Event code: 133490**)

Course organiser: Professor Sally Ibbotson

The registration deadline is only weeks away so don't miss the opportunity to attend this course which covers all areas of photodermatology and is delivered by speakers with expertise across all areas of topics covered.

This educational course is designed to cover the basic science and clinical application of photodermatology, phototherapy, photodynamic therapy and lasers, and in particular, covers the photodermatology knowledge-based requirements of the UK Specialty training curriculum for trainee dermatologists. It is also aimed at early career consultant dermatologists, allied health care professionals and scientists with an interest in photodermatology and all wanting to know more about light and skin. The basics of photobiology and photophysics, the photosensitivity diseases, investigation and management will be thoroughly covered.

Registration will close on **Friday 17th September** and interested parties should contact Mrs Lorraine Malone, Course Co-ordinator (l.malone@dundee.ac.uk); Tel: 01382 383272. **It is a requirement for registration to the course that all delegates must provide confirmation that they are registered with a recognised professional body.**
