

residents in dermatology to understand the classification of eczemas and perhaps this could be addressed in a future edition of *Rook's*. Urticaria and vasculitis are dealt with in a very detailed way and provide important information for clinicians.

The chapter on autoinflammatory diseases is outstanding, which is a rapidly developing area with new insights. The reader can access detailed information presented in a systematic fashion. The other chapters in Volume 2 Part 4 address various immunoinflammatory diseases, often with a systemic component. Classification and new insights into the treatment are provided in these chapters.

*Rook's Textbook of Dermatology* is a must for every dermatologist and for training centres in dermatology.

## Erratum

DOI: 10.1111/bjd.15536

In the article by Bettoli et al<sup>1</sup>, an author's surname was misspelt as V. DeVita. It should have been V. De Vita.

The publisher apologizes for the error.

## Corrigendum

DOI: 10.1111/bjd.15537

In the BAD Guidelines by Warren et al<sup>1</sup>, there was a typographical error in the text. On pages 29 and 32, and in Table 8, the units for PIINP levels should read  $\mu\text{g L}^{-1}$  and not  $\text{mg mL}^{-1}$ .

The authors apologize for the error.
