Economic analysis	<i>Comments on aspects such as the appropriate time horizon.</i>	
Equality	<p><i>NICE is committed to promoting equality of opportunity, eliminating unlawful discrimination and fostering good relations between people with particular protected characteristics and others. Please let us know if you think that the proposed remit and scope may need changing in order to meet these aims. 	<p>people protected by the equality legislation than on the wider population, e.g. by making it more difficult in practice for a specific group to access the technology;</p> <ul style="list-style-type: none"> <li>• could have any adverse impact on people with a particular disability or disabilities.</li> </ul> <p>Please tell us what evidence should be obtained to enable the Committee to identify and consider such impacts.</p>

Innovation	<p>Do you consider the technology to be innovative in its potential to make a significant and substantial impact on health-related benefits and how it might improve the way that current need is met (is this a 'step-change' in the management of the condition)?</p> <p>Do you consider that the use of the technology can result in any potential significant and substantial health-related benefits that are unlikely to be included in the QALY calculation?</p> <p>Please identify the nature of the data which you understand to be available to enable the Appraisal Committee to take account of these benefits.</p>	<p>Yes</p> <p>No</p>
Questions for consultation	<p>Please answer any of the questions for consultation if not covered in the above sections. If appropriate, please include comments on the proposed process this appraisal will follow (please note any changes made to the process are likely to result in changes to the planned time lines).</p>	
<p>Any additional comments on the draft scope:</p> <p>We support the appraisal and feel Lanadelumab will be a much needed additional therapy for long-term prophylaxis of angioedema attacks in hereditary angioedema types I and II. Clinical trial evidence supports the effectiveness of lanadelumab which has few side effects.</p>
