

Imperial College
London

Short courses in Allergy

Spring/Summer 2021

A range of online
courses in Allergy
tailored to your career
ambitions.

www.imperial.ac.uk/cpd/allergy

At Imperial College London, our courses are run by world-leading experts and incorporate up-to-the-minute information on new research and clinical practice to ensure that what you learn is always relevant to what you do.

These innovative online courses will give an in-depth overview of the topics, from the pathophysiology to the clinical presentation, diagnosis as well as advanced management and prevention strategies. The courses, designed for all levels of healthcare professionals, will include asynchronous materials (pre-recorded lectures and resources) as well as a range of live interactive sessions.

Food Hypersensitivity 19 - 22 April 2021

During this course you will study a comprehensive overview of food hypersensitivity in children and in adults and develop a robust understanding of the scientific basis underpinning its pathophysiology, diagnosis, prevention and management. **Visit:** www.imperial.ac.uk/cpd/foodhyper

Allergic Skin Disease 7 - 8 June 2021

This course will cover a wide range of allergic skin diseases, including atopic eczema, contact dermatitis, urticarias, hereditary and acquired angioedemas, photodermatoses and drug allergies. Challenging topics such as the role of food allergy in eczema, refractory urticaria and mastocytosis will be addressed. **Visit:** www.imperial.ac.uk/cpd/skindisease

Paediatric Allergy 9 - 10 June 2021

This course will cover advanced aspects of allergic diseases in childhood, from the mechanisms underlying the 'atopic march' to difficult clinical scenarios such as multisystem allergic disease, immunodeficiency, adolescent transition and psychological or safeguarding issues.
